Model B

The drawings and specifications contained herein shall not be reproduced in whole or in part without written permission.

IBM has prepared this maintenance manual for the use of IBM Customer Engineers in the installation, maintenance and repair of the specific machines indicated. IBM makes no representations that it is suitable for any other purpose.

Information contained in this manual is subject to change from time to time. Any such change will be reported in subsequent revisions or distributed through Customer Engineering Memorandums (CEMs) to all subscribers.

Requests for copies of IBM publications should be made to your IBM representative or to the IBM Branch Office servicing your locality.

Comments about the publications may be addressed to (IBM Corporation, 740 New Circle Road N.W., Publications Department 901, Lexington, Ky. 40511). IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation whatever. You may, of course, continue to use the information you supply.

"It is possible that this material may contain reference to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country."

1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982

SAFETY PRECAUTIONS

All IBM Customer Engineers are expected to take every safety precaution possible and observe the following safety practices when servicing IBM equipment.

Mechanical Safety:

1. *Safety glasses must be worn.*
2. *All safety devices, such as guards, shields, signs, ground wires, etc., must be restored after maintenance. When a guard or shield is removed to observe or make an adjustment, that shield must be replaced when work in the area is completed.*
3. *Watches, rings, necklaces, ID bracelets, etc., must be removed when servicing the machine.*
4. *Care must be used when working near moving parts. Keep hair away from moving parts. Avoid wearing loose clothing that might be caught in the machine. Shirt sleeves must be kept buttoned or rolled above the elbows. Ties must be tucked in the shirt or have a tie clasp approximately three inches from the end. Tie chains are not recommended.*

Electrical Safety:

1. *The equipment referenced in this manual may use high voltages. Check voltage labels!*
2. *Safety glasses must be worn when checking energized circuits.*
3. *If a circuit is disconnected for servicing or parts replacement, it must be reconnected and tested before allowing the use of the machine.*
4. *Power should be removed from the machine for servicing whenever possible. Remember, when checking voltages, avoid contacting ground potential, such as metal floor strips, machine frame, etc.*
5. *Meter continuity checks should be used instead of voltage checks whenever possible.*
6. *Do not apply power to any part, component, or subassembly when it is not physically mounted in the machine, or its approved service position.*

General Safety:

1. *Each Customer Engineer is responsible to be certain no action on his/her part makes the product unsafe or exposes customer personnel to hazards.*
2. *Store the removed machine covers in a safe, out of the way place where no one can trip over them.*
3. *If you must leave the machine in a down condition, always install the covers and disconnect the power before leaving the customer's office.*
4. *Always place CE tool kit away from walk areas where no one can trip over it.*
5. *Maintain safe conditions in the area of the machine while performing and after completing maintenance.*
6. *Before starting the equipment, make sure fellow CEs and customer personnel are not in a hazardous position.*
7. *All the machine covers must be in place before the machine is returned to the customer.*

Note: *Refer to the Safety CEMs relating to this product(s) for further safety precautions.*

PART NUMBER PRICE LIST (PN/PL) INSTRUCTIONS

This PN/PL is used with APM **S241-5232-2**. When a selling price is not shown in this listing, contact your local IBM Branch Office.

Parts information contained is for the following products:

Equipment Description	Machine Type
Black Model (01, 04)	6110
Model A (All Models)	6111
Model B	6112
Model B I/O	6114

SPECIAL PART NUMBER IDENTIFICATION

Part numbers with a code printed in the description column provide footnotes, restricted parts.

Code	Additional Information
1	Refers to a note at the end of the Mechanism list. Machine serial numbers are approximate.
"Q"	Restricted Part; Contact CE Management. Reference SRL P&S 035

Part numbers with a code printed to the right of the selling price provide additional information for ordering, identifying or locating part.

Code	Additional Information
A	Specify color
C	Typestyle, character, position, catalog number
E	Typestyle, keyboard arrangement, number of characters, machine model
G	Specify forms width
H	Pin-to-pin dimension and hardness
#	*Recommended Parts Inventory Parts. Reference CE. Recommended Parts Inventory (F/N Z241-5613)
R	*All Red Tag parts usage must be recorded regardless of the machine type and status.
U	*Used Part Returnable For Credit. Reference General Administrative CEM No. 10 or appropriate SRL by Product.
WT	*World Trade
FE	*Field Engineering Part. If not in OP stock, check local FE stock before ordering Code A
B4	*Japanese Series III
T	Supplies or accessory items
S	Specify length in feet

*These codes may be used in combination with other codes. Example: #R — RPI/Red tag; WR — World Trade/Red tag.

NOTE: World Trade (WT) part reference numbers and part numbers NOT included in this listing may be obtained by ordering World Trade Part Number/Price Lists through local CE Management (Reference ordering instructions contained in SRL AV/P 001).

Parts Packet Parts — Part numbers contained in Parts Packets are identified by a two-digit number printed on the right of the selling price that corresponds with the last two digits of the Parts Packet Part Number. Complete Parts Packet Part Numbers are listed before the first mechanism code in this publication.

Example:	0332747	Retainer	.04	13
	is in Packet No. 13 (1152413)			
Example:	1070029	Pin Clevis	.15	06
	is in Packet No. 6 (1280706)			

CEM INFORMATION

This edition contains part numbers and prices previously printed in CEMs through CEM No. 174.

When new parts information is released in a CEM and the parts are not shown in the illustration portion of the Parts Catalog, the CEM number and the reference number will be printed at the beginning of the proper mechanism.

MISCELLANEOUS EQUIPMENT SPECIFICATION (MES) AND SPECIAL ENGINEERING REQUEST (SER) PARTS INFORMATION

Features, devices, specification changes or replacement parts not shown in the Parts Catalog must be ordered through CE Management and Branch Office Sales.

For step-by-step instructions, refer to the Combined Service Information Booklet (CSI).

SET OF GROUND TYPE,ORDER UNGROUND TYPE WITH SEGMENT P/N 1268332
-
SET OF TYPE UNGROUND,WITHOUT SEGMENT,ORDER P/N 1268331
-
NOTE WHEN ORDERING SETS OF TYPE,SPECIFY MACHINE MODEL,TYPE STYLE,KEYBOARD ARRANGEMENT,AND NUMBER OF CHARACTERS.
-
IF HARDENED TYPEBARS ARE DESIRED, SPECIFY ON ORDER. IF ONLY CERTAIN TYPEBARS IN THE SET ARE TO BE HARDENED, SPECIFY BY POSITION.
-
WHEN LIGHTENED TYPEBARS ARE DESIRED FOR POSITIONS NORMALLY NOT LIGHTENED, AND VICE-VERSA, FOLLOW SAME PROCEDURE USED FOR HARDENED TYPEBARS.
-
WHEN ORDERING SET OF TYPE FOR 88 CHARACTER KEYBOARD, SPECIFY CHARACTER FOR 0 POSITION.
-
NOTE AS MATCHED SETS OF TYPE AND SEGMENT ARE PRE-ALIGNED, THESE SHOULD BE USED INSTEAD OF SETS OF TYPE WITHOUT SEGMENT. ALSO, ORDER UNGROUND TYPE WITH SEGMENT FOR REPLACEMENT UNLESS CUSTOMER HAS CHANGEABLE TYPEBARS.

PLATEN INDEXING CHART

The platen indexing chart was designed using part numbers for all machines that use standard indexing parts. It can be used for finding the number of lines in 10 inches of form. To determine the number of lines in 1" of form, move decimal point one place to left. To read the chart, follow horizontal lines to right-hand margin. All parts in a specific line that are designated A or B in the chart heading are used as an assembly to give specified lines per inch on a Model A or B. Allowance for the thickness of forms must be made when selecting the ratchet.

This chart applies to forms with .030" thickness or less. Each additional .030" thickness requires more teeth in the ratchet. By using the table listed below, additional thickness can be compensated.

29T to 34T – 1 additional tooth
35T to 57T – 2 additional teeth
58T to 66T – 3 additional teeth

PLATEN RATCHET P/Ns			DETENT LEVER POSITIONS						DETENT P/Ns		DETENT SPRINGS		INDEX PAWLS		UPPER INDEX ** PAWL STOP		
No. Of Teeth	Model A	Model B Universal	1 Pos	Teeth Index	2 Pos	Teeth Index	3 Pos	Teeth Index	Mod A	Mod B	Mod A	Mod B	Mod A	Mod B	Mod A	Mod B	Stamp No.
